Non-IFRS Performance Measures

In this document we use certain supplemental measures of key performance that are not measures recognized under IFRS and do not have standardized meanings prescribed by IFRS. These performance measures are net operating income ("**NOI**"), funds from operations ("**FFO**"), operating funds from operations ("**OFFO**"), adjusted funds from operations ("**AFFO**") and earnings before interest, taxes, depreciation and amortization ("**EBITDA**"). Management believes that NOI, FFO, OFFO, AFFO and EBITDA are relevant measures of the Company's performance, as described below. The IFRS measurement most directly related to these measures is cash flow from operations. Please refer to the "Business Performance" section of this MD&A for a reconciliation of cash flow from operations to AFFO.

"**NOI**" is defined as property revenue net of property operating expenses.

"**FFO**" is a recognized earnings measure that is widely used by public real estate entities, particularly by those entities that own and operate income-producing properties. FFO is a financial measure which should not be considered as an alternative to net income, cash flow from operations, or any other operating or liquidity measure prescribed under IFRS. The Company presents FFO in accordance with the REALpac White Paper on Funds From Operations for IFRS (Source: White Paper on Funds From Operations for IFRS - Revised April 2014). The use of FFO, combined with the required IFRS presentations, has been included for the purpose of improving the understanding of the operating results.

"**OFFO**" is FFO adjusted for one-time items such as the Series A Debentures premium payment and presentation of finance charges on a cash interest basis. Management is of the view that OFFO presents a better measure of earnings for the Company.

"**AFFO**" is defined as OFFO plus the principal portion of construction funding received, amounts received from income support arrangements and non-cash deferred share unit compensation expense less maintenance capital expenditures ("**maintenance capex**"). Other adjustments may be made to AFFO as determined by management and the Board of Directors at their discretion. Management believes AFFO is useful in the assessment of the Company's operating cash performance, and is also a relevant measure of the ability of the Company to pay dividends to shareholders.

"**EBITDA**" is defined as earnings before interest, taxes, depreciation and amortization, construction funding proceeds and non-recurring items. Other adjustments may be made as determined by management and the Board of Directors at their discretion.

The above measures should not be construed as alternatives to net income (loss) or cash flow from operating activities determined in accordance with IFRS as indicators of the Company's performance. The Company's method of calculating these measures may differ from other issuers' methods and accordingly, these measures may not be comparable to measures presented by other publicly traded entities.

Key Performance Indicators

Management uses the following key performance indicators (the "**Key Performance Indicators**") to assess the overall performance of the Company's operations:

- **Occupancy**: Occupancy is a key driver of the Company's revenues.
- **NOI**: This value represents the underlying performance of the operating business segments. Please refer to the "Non-IFRS Performance Measures" section of this MD&A above.
- **OFFO and OFFO per Share**: Management uses OFFO as an operating and financial performance measure. Please refer to the "Non-IFRS Performance Measures" section of this MD&A above.
- **AFFO and AFFO per Share**: These indicators are used by management to help measure the Company's ability to pay dividends. Please refer to the "Non-IFRS Performance Measures" section of this MD&A above.
- **Payout Ratio**: Management monitors the ratio of dividends per share to basic AFFO per share to ensure that the Company adheres to its dividend policy, in line with the Company's objectives.
- **Debt Service Coverage Ratio**: This ratio is useful for management to ensure that it is in compliance with its financial covenants.
- **Debt to Gross Book Value**: In conjunction with the debt service coverage ratio, management monitors this to ensure compliance with certain financial covenants.
- **Weighted Average Cost of Debt**: This is a point in time calculation which is useful in comparing interest rates, either period over period, or to the then current market parameters.
- **Debt to EBITDA Ratio**: This ratio measures the number of years required for current cash flows to repay all indebtedness.
- **Interest Coverage Ratio**: Interest coverage ratio is a common measure used by debt rating agencies to assess an entity's ability to service its debt obligations.
- **Weighted Average Term to Maturity**: This indicator is used by management to monitor its debt maturities.
- **Same Property Percent Change in NOI**: This measure is similar to "same-store sales" measures used in the retail business and is intended to measure the period over period performance of the same asset base, excluding assets undergoing new development, redevelopment or demolition.

The above key performance indicators used by management to assess the overall financial performance of the Company's operations should not be construed as alternatives to net income (loss) or cash flow from operating activities determined in accordance with IFRS as indicators of the Company's performance. The Company's use of these measures and its method of calculating may differ from other issuers' use and methods and accordingly, may not be comparable to the key performance indicators of other publicly traded entities.

Business Overview

Please refer to the Company's MD&A for the year ended December 31, 2014, as well as the AIF, for an in-depth discussion of the Business Overview.

Outlook

Management believes that with a diversified portfolio, development potential and strong operating platform, the Company is well positioned for both organic and external growth, supported by the favourable demographics of a growing seniors' population, the strong demand for seniors' services outside of hospitals, and the regulatory and operational barriers to entry in all four of the Company's business segments.

Long-Term Care

During Q2 2015, LTC delivered solid results, as reflected by the increase of 1.1% on same property NOI over the prior year comparable period. The Company continued to experience strong demand for all LTC beds, with private average occupancy for Q2 2015 at 99.7%. To date, 60.9% of its Class A private beds, compared to 58.9% as of March 31, 2015, have been converted to the increased per resident rates of $19.75, $21.50 or $23.25 per day.

Management continues to work through detailed feasibility analyses and related planning with respect to the potential redevelopment of its older LTC homes, in light of the Ministry of Health and Long-Term Care's ("**MOHLTC**") renewal strategy guidelines, including with a view to redeveloping or upgrading to the new Class A structural classifications. Management anticipates that redeveloped LTC homes will be mostly green field projects, requiring extended periods of time for both planning and approvals phases, and further anticipates creating and implementing a seniors' living continuum of care in certain of these redeveloped LTC homes by providing a range of independent living, assisted living, memory care and specialized LTC services. See Growth Strategy below.

The MOHLTC recently issued notice of initiatives intended to reform the Ontario Drug Benefit ("**ODB**") program to implement a number of changes to pharmacy payments, practices and programs. The proposed initiatives would take effect on October 1, 2015 and include lowering the dispensing fee paid to pharmacies that serve LTC residents, as well as the mark-up paid to pharmacies on eligible ODB prescription drugs. The Company is currently actively reviewing the MOHLTC initiatives and is in the process of determining the impact of the proposed changes.

Retirement

In Q2 2015, the Company's RR portfolio experienced a 7.0% increase in NOI over the prior year comparable period. As at occupancy increased by 5.8% over Q2 of the prior year to 88.8% at the end of Q2 2015. Management expects the Company to generate moderate organic growth in its RR portfolio through gains in occupancy in the following four RR homes that are currently in lease-up: Astoria Retirement Residence ("**Astoria**") (formerly Royale Astoria), Peninsula Retirement Residence ("**Peninsula**") (formerly Royale Peninsula), Royale Place Retirement Residence ("**Royale Place**") (formerly Royale Kingston) and Red Oak Retirement Residence ("**Red Oak**") (formerly Royale Kanata). Prompted by the Company's rebranding initiative, management expects that these lease-up homes are well positioned to achieve an average occupancy of 90% by the end of Q4 2015, with the exception of Red Oak. Management believes that the renaming of the RR homes and improvements in the Company's website and information flow, together with its demonstration of a renewed commitment to the communities in which the homes operates, will have a positive impact on sales and marketing efforts.

Home Care

Management continues to expect that PHCS, the Company's Home Care business, will experience minimal growth in personal support worker volumes through its contractual arrangements with Community Care Access Centres (**"CCACs"**), offset by increased operating expenses resulting from ongoing regulatory and quality standards compliance. Management remains committed to maintaining high quality Home Care services to meet client needs.

General and Administrative Expenses

Management continues to make progress on strengthening the systems and processes supporting all four of its business segments. Management expects to continue to incur some one time costs associated with the transition and rebranding, as well as in reinforcing and modernizing the head office functions to support the recent and anticipated future growth of the Company.

Growth Strategy

The Company continues to strengthen its operating platform in RR living and LTC, and expects to maintain growth through:

- Organic Growth - by maximizing the Company's assets through gains in RR occupancy levels and assisted living services; maintaining consistently high LTC occupancy; maximizing LTC preferred accommodation occupancy; and disciplined cost management.

- Acquisition Growth - by effecting strategic acquisitions and focusing on growing the Company's operating platform across Canada in both LTC and RR living.

- Development and Redevelopment - analyzing and investing in feasible options to rebuild some of its older LTC facilities on green field sites and concurrently create a continuum of care with the addition of independent living, assisted living, memory care and specialized LTC services.

As a result of the Company's diversified strategy, management believes that the Company is well positioned to respond to changing preferences and trends in seniors living. In the near term, management expects stable financial performance. In the longer term, management remains confident in its beliefs that the Company and its stakeholders are well positioned for stable and predictable returns, a secure dividend and future growth.

Notes:

1. Beginning in Q2 2014, management has elected to add back the impact of the MOHLTC reconciliation adjustments (discussion below) to OFFO and AFFO. Also, due to the immaterial nature of the adjustment in prior years, management has elected not to restate the 2013 information presented above.
2. The comparative periods exclude respite occupancy data as it was not captured for periods prior to 2014.
3. Total debt includes the Convertible Debentures and is net of amounts paid into the principal reserve fund on the Series B Debentures.

The Company's quarterly financial results are impacted by various factors including, but not limited to, the timing of acquisitions, seasonality of utility expenses, timing of co-payment changes, government funding rate increases and the timing of revenue recognition to match spending within the flow-through envelopes, and capital market and financing activities.

The Company recorded MOHLTC reconciliation adjustments that decreased revenue and NOI by $536 in Q2 2015 and increased revenue and NOI by $25 in Q1 2015. In the prior year, the MOHLTC reconciliation adjustments recorded decreased revenue and NOI by $269 in Q4 2014, $69 in Q3 2014 and $956 in Q2 2014. The adjustments relate to the difference between the Company's annual reconciliation filings with the MOHLTC and the MOHLTC's assessments of those filings, primarily for the reconciliation years 2007 through to 2012 inclusive. These adjustments are based on confirmation with the MOHLTC and the Company's best estimate of the probability of recovery of the outstanding amounts, based on recent information and interpretation of the funding mechanism.

During Q1 2014, $322 million of Series B Debentures were issued to generate proceeds to redeem the Series A Debentures in full, resulting in the payment of an $18.4 million redemption premium and associated expenses. The Series A Debentures and Series B Debentures were both outstanding for a 21 day-period during Q1 2014.

In December 2013, the Company completed the acquisition of a portfolio of six LTC homes, two RRs, two properties containing both an LTC and RR component and third party seniors living management business previously operated by Specialty Care Inc. ("**2013 Acquisition**"), which contributed approximately $1,783 to NOI for the one month period in Q4 2013.

A discussion of the operating results for the three and six months ended June 30, 2015 compared to the same period in the prior year is provided below under the section "Operating Results".

The activities are eliminated on consolidation and should still be reflected as part of the operating line of business results. The activities relate to educational services provided by the Home Care segment to the LTC segment. The operation and management of a portion of these services has been transferred to the LTC segment in the current year for internal management and synergies.

Note:
1. The revenue decline in the Home Care business is primarily due to internal business realignment, relating to professional services that serviced the Company's LTC homes.

Note:

1. The NOI decline in the Home Care business is primarily due to internal business realignment, relating to professional services that serviced the Company's LTC homes, and restructuring charges of $90 during Q2 2015.

For the Quarter

Revenue

Revenues for Q2 2015 increased by $3,512 to $115,186, compared to Q2 2014. LTC revenues increased by $2,453 which was primarily attributable to government funding changes to the flow-through envelopes and the related timing of revenue recognition along with higher preferred accommodation revenues.

RR revenues for Q2 2015 increased by $506 to $10,693, compared to Q2 2014, primarily due to gains in occupancy.

Home Care revenues of $4,296 for Q2 2015 are consistent with the revenues for Q2 2014. Decrease in revenues due to internal business realignment, relating to professional services that serviced the Company's LTC operations, was offset by higher revenues resulting from the timing of CCAC volumes compared to Q2 2014.

Operating Expenses

Operating expenses for Q2 2015 increased by $2,737 to $94,236, compared to Q2 2014. Of this increase, LTC represented $2,273, which was primarily attributable to higher flow-through envelope expenses.

RR operating expenses for Q2 2015 increased by $199 to $6,000, compared to Q2 2014. The increase was primarily attributable to higher variable expenses resulting from gains in occupancy.

Home Care operating expenses increased by $211 to $3,895 which was primarily attributable to restructuring charges and timing of benefit costs.

NOI

NOI for Q2 2015 increased by $775 to $20,950, compared to Q2 2014. LTC NOI increased by $180, primarily due to timing of government funding revenues net of flow-through envelope expenses and increased preferred accommodation revenues.

RR NOI for Q2 2015 increased by $307 to $4,693, compared to Q2 2014 principally attributable to gains in occupancy.

Home Care’s NOI for Q2 2015 decreased by $212 to $401, compared to Q2 2014. The decrease was primarily attributable to restructuring charges and timing of benefit costs.

Due to the seasonality of certain operating expenses and occupancy activities, trends which may appear in operating margins may be merely coincidental, and readers should not rely upon net operating margin calculations herein.

Administrative Expenses

Administrative expenses for Q2 2015 increased by $417 to $4,890 compared to Q2 2014. The increase was primarily attributable to restructuring charges of $259, rebranding costs of $129 and mark-to-market adjustments on deferred share units of $114 partially offset by timing of other administrative expenses.

Depreciation and Amortization

Depreciation and amortization for Q2 2015 decreased by $1,308 to $8,907 compared to Q2 2014. The decrease was primarily attributable to certain resident relationship intangibles and building assets being fully amortized during the fiscal year 2014.

Net Finance Charges

Net finance charges for Q2 2015 decreased by $515 to $4,998 compared to Q2 2014. The decrease was primarily related to lower interest expense on long-term debt of $384 and greater gain on the mark-to-market adjustments of interest rate swap contracts of $266. This was partially offset by lower interest income earned on construction funding receivable.

Transaction Costs

Transaction costs for Q2 2015 increased by $123 to $232, compared to Q2 2014. The increase of $123 was primarily attributable to an income support adjustment of $209 partially offset by the timing of transactional activities compared to the same period in the prior year.

Income Taxes

Income tax expense for Q2 2015 was $641, compared to an income tax recovery of $511 in Q2 2014. The current income tax expense was $343 compared to an income tax recovery of $471 in Q2 2014. The comparative prior period tax recovery was primarily attributable to a book to filing adjustment for 2013 of approximately $452. The current income taxes have been calculated at the weighted average combined corporate tax rate of 26.49%. The deferred tax expense of $298 in Q2 2015 represents an increase of $338 over the comparable prior year period recovery of $40, primarily as a result of a book to filing adjustment of approximately $229.

For the Year to Date

Revenue

Revenues for the six months ended June 30, 2015 increased by $4,384, to $228,398 over the comparable prior year period. LTC revenues increased by $2,743 to $198,207 which was primarily attributable to government funding changes to the flow-through envelopes and the related timing of revenue recognition in addition to higher preferred accommodation revenues.

RR revenues increased by $1,055 to $21,233 over the comparable prior year period, which was primarily attributable to gains in occupancy.

Home Care revenue decreased by $190 to $8,498 compared to the six months ended June 30, 2014. This was primarily attributable to the internal business realignment relating to professional services that serviced the Company's LTC homes, partly offset by higher revenues resulting from the timing of CCAC volumes.

Operating Expenses

Operating expenses for the six months ended June 30, 2015 increased to $187,450, compared to $184,311 in the prior year. Of this $3,139 increase, LTC accounted for $2,386, which was primarily attributable to higher flow-through envelope expenses.

RR operating expenses for the six months ended June 30, 2015 were $11,825, compared to $11,538 in the prior year. The increase of $287 was primarily attributable to increased variable expenses due to gains in occupancy.

Home Care expenses for the six months ended June 30, 2015 of $7,568 increased by $184 over the comparable prior year period which was primarily attributable to restructuring charges and timing of benefit costs.

NOI

Sienna generated NOI of $40,948 for the six months ended June 30, 2015. This represented an increase of $1,245 over the comparable prior year period.

LTC NOI increased by $357 for the period, due primarily to the increased preferred accommodation revenue, partly offset by higher flow-through envelope expenses net of flow-through government funding.

The retirement segment's NOI increased by $768 over the prior year primarily due to gains in occupancy.

Home Care’s NOI of $930 reflects a decrease of $374 over the comparable period. This was primarily due to restructuring charges and timing of benefit costs. In addition, Home Care experienced minimal growth in personal support worker volumes through its contractual arrangements with CCAC, offset by increased operating expenses resulting from ongoing regulatory and quality standards compliance.

Due to the seasonality of certain operating expenses and occupancy activities, trends which may appear in operating margins may be merely coincidental, and readers should not rely upon net operating margin calculations herein.

Administrative Expenses

Administrative expenses increased to $9,292 during the six months ended June 30, 2015, compared to $8,697 in the prior year. The increase of $595 was primarily the result of restructuring charges of $259, rebranding costs of $242 and mark-to-market adjustment on deferred share units of $223 partially offset by timing of other administrative expenses.

Depreciation and Amortization

Depreciation and amortization for the six months ended June 30, 2015 decreased to $18,416 from $20,042 for the prior year. The decrease was primarily attributable to certain resident relationship intangibles and building assets being fully amortized during the fiscal year 2014.

Net Finance Charges

Net finance charges for the six months ended June 30, 2015 were $10,375, compared to $34,906 for the comparable period last year. The decrease of $24,531 was principally the result of the incremental finance charges of approximately $23,353 from the redemption of the Series A Debentures in Q1 2014. The incremental finance charges of $23,353 primarily resulted from the redemption premium of $18,392 and the write-off of the remaining portion of the fair value increment on the Series A Debenture of $3,835. The additional decrease in net finance charges of $1,178 was primarily attributable to lower interest expense on long-term debt and the favourable change on the mark-to-market adjustment on interest rate swap contracts.

Transaction Costs

For the six months ended June 30, 2015, transaction costs were $270 compared to $659 for the same period in the prior year. The decrease of $389 was primarily attributable to the timing of transactional activities which was partly offset by the income support adjustment of $201 during the six months ended June 30, 2015.

Income Taxes

The income tax expense for the six months ended June 30, 2015 was $963 compared to income tax recovery of $6,913 in the comparable prior year period. The current income tax expense was $628 compared to an income tax recovery of $2,178 for the six months ended June 30, 2014. The comparative prior period tax recovery was primarily attributable to (i) the tax shield created by the redemption premium paid on the Series A Debenture and the settlement of a bond-lock hedge recorded in the first quarter of 2014, and (ii) a book to filing adjustment of approximately $452. The current income taxes have been calculated at the weighted average combined corporate tax rate of 26.49%. The deferred tax expense of $335 increased by $5,070 over the comparable period in the prior year primarily as a result of the tax shields discussed above and a book to filing adjustment of approximately $229 recorded in the current quarter.

For the Quarter

FFO

FFO decreased by $242 to $10,463, compared to Q2 2014. The decrease of $242 was primarily attributable to higher current income tax provision and administrative costs, partly offset by improved NOI contributions and lower net finance costs as a result of lower interest expense on long-term debt.

OFFO

OFFO decreased by $444 to $10,448, compared to the same quarter last year. The decrease was principally related to lower MOHLTC reconciliation adjustment and the decrease in FFO as noted above.

AFFO

AFFO decreased by $868 to $12,179, compared to Q2 2014. The decrease was principally related to the decrease in OFFO noted above and higher maintenance capex.

For the Year to Date

FFO

FFO increased by $21,515 to $20,491 for the six months ended June 30, 2015 compared to the same period of 2014. The increase was primarily due to improved NOI contributions and lower net finance costs as a result of the costs incurred for the redemption of the Series A Debentures in Q1 2014, partly offset by an increase in the current income tax provision.

OFFO

OFFO decreased by $199 to $20,057 over the comparable period in the prior year. The decrease was principally related to the higher current income tax provision and lower MOHLTC reconciliation adjustments, partly offset by the income tax shield on the settlement of the bond-lock hedge recorded in the first quarter of 2014 and improved NOI contributions.

AFFO

AFFO decreased by $736 to $24,015 for the six months ended June 30, 2015 as compared to the same period of 2014. The decrease was mainly attributable to the decrease in income support received and the lower OFFO discussed above.

Reconciliation of Cash from Operations to Adjusted Funds from Operations

Capital Resources

The Company's total debt as at June 30, 2015 was $602,960 (December 31, 2014 - $616,081), net of the Series B Debentures principal reserve fund of $7,691 (December 31, 2014 - $4,751). The decrease of $13,121 was primarily related to the voluntary repayments towards the Company's revolving credit facilities of $6,500, monthly payments to the Series B Debentures principal reserve fund and to mortgage liabilities. During Q1 2015, the Company extended the maturities of Red Oak and Royale Place's ("**Ontario Portfolio**") credit facility and Astoria's credit facility to two years later to April 26, 2017 and May 22, 2017, respectively. As at June 30, 2015, the Company had drawn $37,000 under the Ontario Portfolio's credit facility and $22,500 under Astoria's credit facility. During the current quarter, the Company increased the amount available under one of its credit facilities from $10,000 to $20,000. No amount had been drawn from this credit facility as at quarter end. As at June 30, 2015, the Company had total committed and undrawn facilities of $41,500. As of June 30, 2015, the Company had a working capital deficiency of $20,727 arising from the timing of wage and benefit accruals and the current portion of long-term debt of $8,050, primarily relating to the portion of mortgage liabilities within a 12-month period. To support Sienna Senior Living Inc.'s working capital deficiency, the Company plans to use its operating cash flows and, if necessary, undrawn credit facilities, which management believes will be sufficient to address this deficit.

Liquidity and Capital Commitments

Liquidity

The Company's primary source of liquidity is cash flow generated from operating activities. The Company expects to meet its operating cash requirements through fiscal 2015, including required working capital, capital expenditures, and currently scheduled interest payments on debt, from cash on hand, cash flow from operations and its committed, but unutilized borrowing capacity.

Capital Commitments

The Company monitors all of its properties for capital requirements. As part of the monitoring exercise, items are assessed and prioritized based on the urgency and necessity of the expenditure.

Debt Strategy

Management's objectives are to access and maintain the lowest cost of debt with the most flexible terms available. The Company's debt strategy involves the use of four types of debt: secured debentures, conventional property-specific secured mortgages, bank credit facilities and the Convertible Debentures.

Commencing in fiscal 2014, management started to build a debt maturity schedule (for fixed term debt) spread evenly over a 10-year period in order to manage interest rate and financial risks. This is a multi-year strategy which will take considerable time to execute. In fiscal 2015 and beyond, the Company plans to capitalize on external growth opportunities and management intends to build the 10-year debt maturity ladder around the Series B Debentures so as to reduce risk when this debenture matures. Part of this debt strategy involves building a pool of unencumbered assets to be able to finance acquisition opportunities as they arise.

The Company has adopted interest coverage guidelines which are consistent with the coverage covenants contained in its bank credit facility agreements. Interest coverage ratios provide an indication of the ability to service or pay interest charges relating to the underlying debt. Some interest coverage ratios, as defined in certain debt instruments, may be defined differently and there may be unique calculations depending on the lender.

Interest Coverage Ratio

Interest coverage ratio is a common measure used by debt rating agencies to assess an entity's ability to service its debt obligations. In general, higher ratios indicate a lower risk of default. Debt Service Coverage Ratio

Debt service coverage ratio is a common measure used by debt rating agencies to assess an entity's ability to service its debt obligations; as well, maintaining the debt service coverage ratio forms part of the Company's debt covenant requirements. In general, higher ratios indicate a lower risk of default. The following calculation takes into consideration the payments into the Series B Debentures principal reserve fund as part of the debt service costs. EBITDA adjusted, as referenced below, is presented in accordance with defined terms in certain covenant calculations. The following is the calculation for the three and six months ended June 30, 2015 and 2014:

The Company has established a dividend reinvestment plan for eligible holders of the Company's common shares, which allows participants to reinvest their cash dividends paid in respect of their common shares in additional common shares at a 3% discount.

Earnings per share

Basic income (loss) per share is calculated using the weighted average number of common shares outstanding during the period. Diluted income (loss) per share is calculated by assuming all convertible securities have been converted at the time of issuance. Any charges or returns on the convertible securities, on an after-tax basis, are removed from loss from operations.

The following table reconciles the numerator and denominator of the basic and diluted income (loss) per share calculation.

The Company has share-based compensation plans described as follows:

*Long-term incentive plan (**"LTIP"**)*

On February 25, 2015, incentive award amounts entitling eligible participants to acquire 11,669 common shares were granted pursuant to the LTIP. On the grant date, the participants paid $9 towards the acquisition of common shares. This payment was recorded as an increase in share capital. Related to the LTIP in the six months ended June 30, 2015, the Company recorded an increase of $17 in share capital (2014 - $12) and $30 in contributed surplus (2014 - $32). Included as a reduction to shareholders' equity is an outstanding loan balance of $441 (December 31, 2014 - $287). Total expense related to the LTIP for the three and six months ended June 30, 2015 were $nil and $30 (2014 - $nil and $32, respectively).

The fair value of LTIP awards granted was determined by using the Cox-Ross-Rubinstein binominal tree model. The following table summarizes the market based rates and assumptions as well as projections of certain inputs used in determining the fair values used in this model:

Valuation date	February 25, 2015	February 25, 2014
Fair value at grant date	$14.80	$12.30
Volatility	15.78%	16.46%
Monthly discrete dividend	$0.075	$0.075
Risk-free rate	1.79%	2.83%
Annual interest rate on participant's loan - prime rate	3.00%	3.00%
Forfeiture rate	0.00%	0.00%

*Restricted share units plan (**"RSUP"**)*

During the six months ended June 30, 2015, 17,007 restricted share units (**"RSUs"**) (2014 - 23,730) were granted pursuant to the RSUP. Total expenses related to the RSUP for the three and six months ended June 30, 2015 were negative $34 and $127, respectively (2014 - $78 and $208, respectively). During the three and six months ended June 30, 2015, 2,567 RSUs were forfeited causing a decrease of $3 to the share-based compensation liability. During the six months ended June 30, 2015, 11,426 RSUs vested and were settled in cash and shares, resulting in a decrease of $168 to the share-based compensation liability. The total liability recorded as part of the share-based compensation liability as at June 30, 2015 was $194 (December 31, 2014 - $235).

RSU awards vest on the third anniversary of the grant date upon which the RSUs are granted (formerly vesting equally at the end of years one, two and three from the grant date).

All amounts are in thousands of dollars except share and per share data, or unless otherwise noted

A summary of the movement of the RSUs granted is as follows:

*Deferred share units plan (**"DSUP"**)*

Total expenses related to the DSUP for the three and six months ended June 30, 2015 were $232 and $459, respectively (2014 - $265 and $439, respectively), which was recognized in administrative expenses. The total liability recorded related to the DSUP as a part of the share-based compensation liability as at June 30, 2015 was $2,798 (December 31, 2014 - $2,339). The value of each DSU is measured at each reporting date and is equivalent to the fair market value of a common share of the Company at the reporting date.

*Executive deferred share unit plan (**"EDSUP"**)*

During Q2 2015, the Board approved the adoption of its amended and restated EDSUP for executive officers and such other officers or employees (**"EDSUP Member**") as the Board of Directors may determine from time to time. Each EDSUP Member, at his or her discretion, is entitled to elect to have up to 100% of his or her annual base incentive awards contributed to the EDSUP. The Company will match all EDSUs so credited in respect of long-term incentive awards up to a maximum of 25% of the long-term incentive awards (up to 35% in the case of the Chief Executive Officer), or such other amount as the Board of Directors may determine. In satisfaction of such contribution, the EDSUP Member is credited that number of EDSUs equal to the quotient obtained by dividing the amount of the contribution by the volume weighted average closing price of the common shares on the TSX for the five trading days immediately preceding the date of payment. Dividends earned on such EDSUs will be credited to the EDSUP Member's account in the form of additional EDSUs, which are calculated using the same methodology as the original grant.

EDSUs vest on the third anniversary of the date upon which the EDSUs are granted (except for EDSUs credited in respect of short-term incentive awards, which vest immediately upon grant), or otherwise at the discretion of the Board of Directors, but may be redeemed only when an EDSUP Member no longer serves the Company. Redemptions are paid out in cash.

The value of each vested EDSU is measured at each reporting date and is equivalent to the fair market value of a common share of the Company at the reporting date. One award issued during the six months ended June 30, 2015 under the EDSUP vested immediately upon grant with a value of $146. Total expenses related to the EDSUP for the three and six months ended June 30, 2015 were $22 and $26, respectively (2014 - $nil and $nil), which was recognized in administrative expenses. The total liability recorded as a part of the share-based compensation liability as at June 30, 2015 was $171 (December 31, 2014 - $nil).
